PROFILE

Product Designer & Front-End Developer with 6+ years of experience designing and building SaaS products. I work across the full product lifecycle, from understanding user needs and mapping complex workflows to designing high-fidelity interfaces and building them in production. My background spans UX/UI design, design systems, and front-end development, so I'm comfortable moving between Figma, product conversations, and code while working closely with product and engineering teams.

SKILLS

- **Product Design:** User Research · Customer Feedback · Stakeholder Interviews · Requirements Gathering · User Flows · Task Flows · Information Architecture · Wireframing · Prototyping · Usability · Human-Centered Design · Iterative Design
- **UI & Design Systems:** Figma · Components · Variants · Auto Layout · Libraries · UI Kits · Style Guides · Storybook · Theming · Developer Handoff · Responsive Design
- **Accessibility:** WCAG · ARIA · Semantic HTML · Accessible Forms · Mobile-First Design
- **Product & Collaboration:** Complex Workflows · Dashboards · Onboarding · Product Strategy · Cross-Functional Collaboration · Agile
- **Development:** Vue.js · Vue 3 · Nuxt · React · JavaScript · TypeScript · HTML5 · CSS3 · SCSS · Tailwind CSS · Composition API · Pinia/Vuex · REST APIs · State Management · Git · GitHub
- **Tools:** Adobe Creative Cloud · Cypress (E2E Testing) · Vite · AI Design & Prototyping Tools

EXPERIENCE

Front-End Developer & UX/UI Designer | Campaign Nucleus

10/2023 – Present · Remote

- Redesigned the event creation workflow end to end, replacing a 5-step wizard (32 inputs in the first two steps) with a 2-step, 4-field quick-create flow and cutting estimated setup time by ~65%.
- Partnered with customer support and account teams to gather user feedback and requirements, then reworked the information architecture so commonly used settings were easier to find.
- Redesigned the public event registration page as a mobile-first, accessible experience with persistent labels, one clear call to action, and organization branding.
- Redesigned the event analytics dashboard around what users actually needed, replacing 8 equal-weight stat tiles with 4 trend-based KPIs, clearer labels, data visualizations, and at-a-glance feature status.
- Partnered with client services to turn a manual onboarding process into a guided, self-serve flow, taking the work from Figma through production.
- Designed the product's first in-app upsell, creating an upgrade flow with premium features, per-event options, and plan-based choices.
- Built designs in production with Vue 3, Tailwind CSS, and Storybook; rebuilt dashboard sub-pages with shared Vue components and consistent FormKit validation; consolidated 15+ page templates into shared partials and led weekly front-end meetings and code reviews.
- Contributed to the Vue 2 to Vue 3 migration and led the Tailwind CSS v3 to v4 migration.

Front-End Developer & UX/UI Designer | BackIt / Veedback

08/2020 – 10/2023 · Remote

- Owned design systems, user flows, and UI for early-stage SaaS products, designing in Figma and building in Vue.js, Nuxt, and Tailwind CSS.
- Led interface redesigns and UX improvements, partnering with product and back-end teams from concept through launch.
- Designed for a global audience with internationalization (i18n).
- Built scalable, reusable Vue components and translated product designs into production-ready interfaces, reducing duplication and supporting faster feature development.

EDUCATION

B.S., Computer Science – Western Oregon University, 2020 · **A.A.** – Chemeketa Community College, 2018
